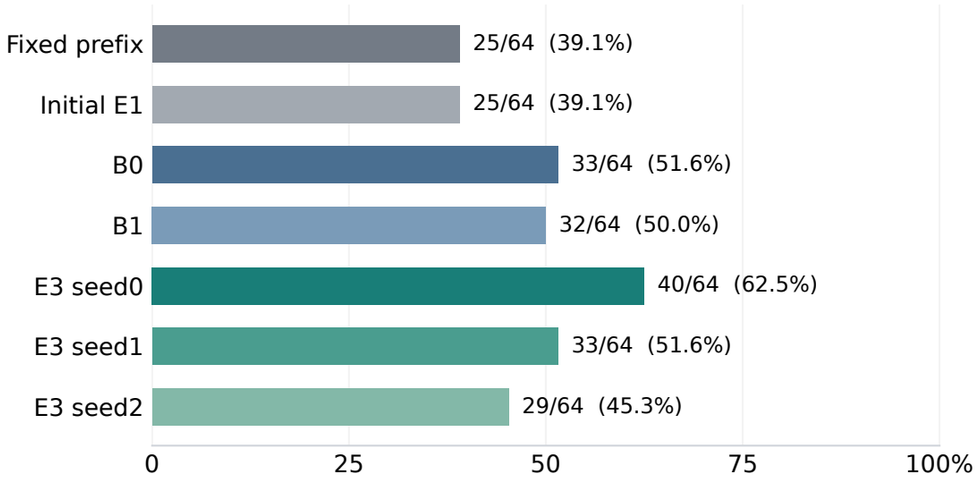
Closed internal results: development signals and fixed evaluations

Separate panels retain their own populations, metrics and exposure limits.

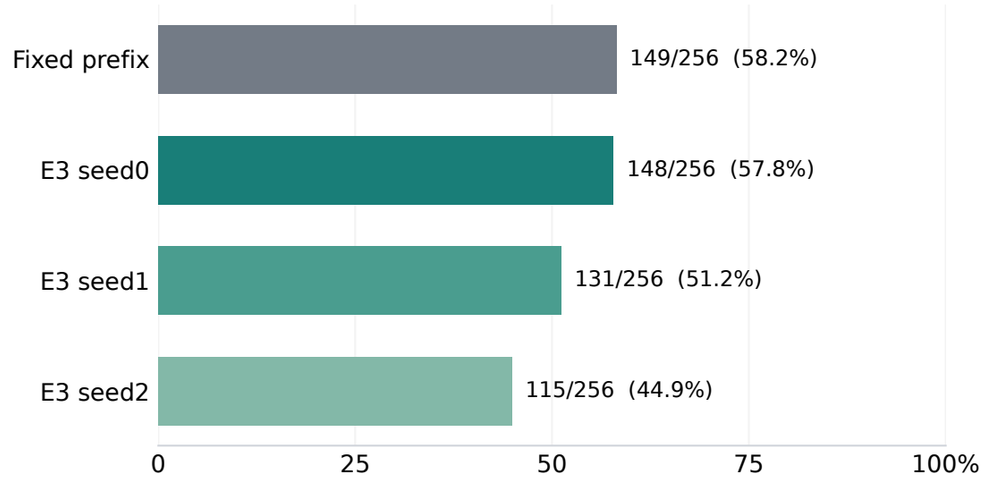
A Exposed autonomous development

64 source families | task C / 64



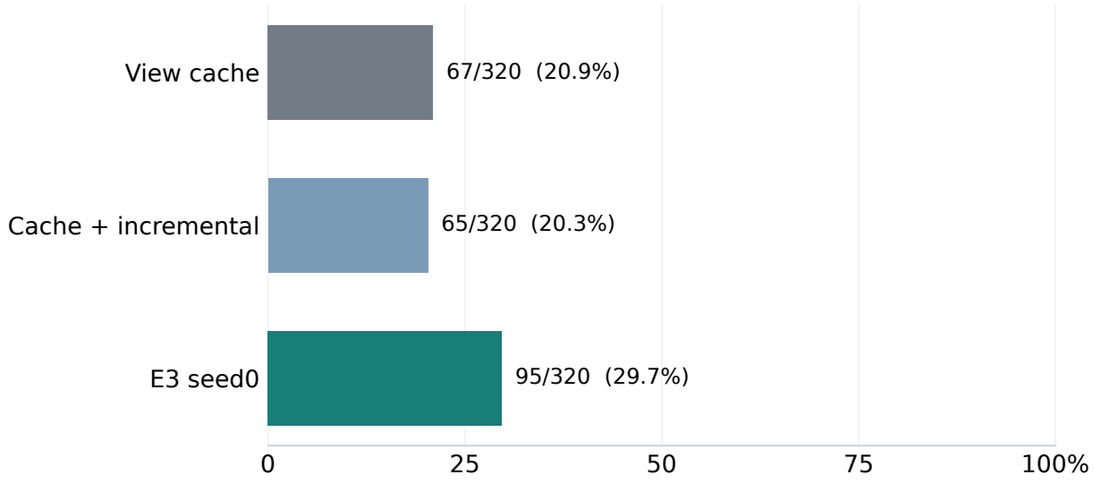
B Frozen autonomous confirmation

256 source families | task C / 256



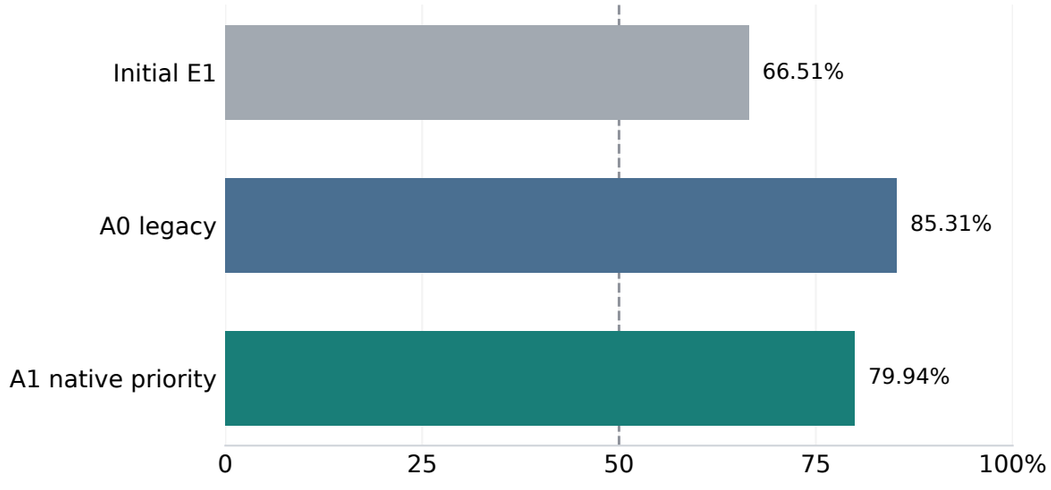
C Update trajectories: development

32 families x 10 requests | task C / 320



D Reserved native conditional queries

64 query families | native balanced accuracy



Both constant predictions: 50%

Task C labels: Source-guided review by the implementation assistant; not blind or independent human evaluation.

No pooled score, cross-panel significance test or winner selection. LME is closed; Mem2Act and final project costs remain open.
